Introducing the new Airetool DAS II Dominator Tube Rolling System

*The new, totally pneumatic,
automatic tube rolling system.*

COOPER Tools

Airetool DAS II Dominator Tube Rolling System

Airetool

The new Airetool DAS II Dominator has been designed to deliver power, performance, durability and unmatched productivity in pneumatic tube rolling technology.

- Ergonomic design for operator comfort and ease of operation.
- Smooth, fluid function design for unparalleled production.
- Positive tool holding system virtually eliminates the chance for operator error.
- Increases expander life by as much as three times compared to conventional hand-held equipment.
- Greatly enhances the accuracy of tube rolling reducing costly improperly rolled tubes.
- All pneumatic system for complete, self-contained tool-holding system.
- No electrical power source required, eliminating typical problems such as fluctuating plant voltages and electrical interference from other equipment.
- Column can be quickly and easily removed from the base for ease of transportation. (Reduced transportation costs)
- CE Certified
- Push-to-start motor runs only when needed, reducing noise, prolonging motor life and conserving compressed shop air.
- Right- or left-hand operation without conversion.
- Standard model features 5 Ft. (1.524m) vertical and horizontal reach. (Models with increased vertical capacity are available upon request).
- Small overall footprint with 4 casters for improved maneuverability.
- Larger integral lifting eye.

For increased production, increased efficiency, decreased leaks and decreased tooling costs, contact your Airetool representative toll free for more information on the all new DAS II Dominator tube rolling system. 1-800-845-5629.
