

# JDN Air Hoists in Application

## Pump Stations

During maintenance and repair works in low space areas JDN Low Headroom Trolleys show their strength.

The advantages at a glance:

- Low head room
- 100% duty cycle, no down-times
- Insensitive to humidity
- Reliable operation
- Easy maintenance
- Only mechanical parts, no electrics or electronics
- Sturdy design for harsh environment
- Manual, reel chain and motorized trolleys for traversing
- Sensitive infinitely variable speed control for the precise positioning of loads

The variety of applications for JDN Air Hoists can be derived from the numerous industries and branches where JDN Air Hoists are deployed. The quality standard of JDN Air Hoists which is much higher than the applicable norms is achieved amongst others by qualifying in extreme applications, whereby safety and security are of utmost priority. With its technical innovation J.D. NEUHAUS offers solutions to almost every material handling problem irrespective of the driving medium: from air, manual and hydraulic hoists up to complete crane installations with explosion proofness. The following are examples of the wide range of applications of JDN products in standard situations of material handling up to special tailor-made solutions to very specific problems.
