### New High Torque Models

## EZ-Slider

### Sliding Torque Arms

An ideal ergonomic solution for multi-tool applications such as a moving production and assembly line where balancers are fixed to a trolley system.

Provides the same flexibility and comfort of a balancer.

Arm is crafted with a lightweight durable carbon fiber.

Easy to install and improves operator comfort and productivity.

Requires little space and doesn't disrupt production flow.

Mountable with a standard rail system, aluminum extrusion or existing work station.

Horizontal Linear Guide Bush allows the Slider arm to travel horizontally on a production floor. Multiple Slider arms can be mounted to it.

### Horizontal Linear Guide Bush

Allows the Slider arm the freedom to travel horizontally (side to side) on a production floor. The Horizontal Linear Guide Bush connects to a standard rail system, aluminum extrusion or existing overhead system and is available in a variety of lengths. The EZ-Slider mounts onto the "Carriage." Each Horizontal Linear Guide Bush includes one Carriage. Additional Carriages can be purchased separately. Multiple Carriages can be added to the Horizontal Linear Guide Bush, which allows for multiple Slider arms to be used freely on a rail system.
